Specification

The system has been assessed on a 50m long Woven Mesh Welded Mesh fence approximately 3000mm high was installed; this included a 135° change in direction. A 710mm short barbed taped concertina was fitted; this was supported on 2 No Galvanized line wires fixed to T bars fitted at each post.

This product can also be used in conjunction with the Heras Centralert product - CentrAlert is a 19" rack mounted system that allows up to twelve separate dual zone analyser cards, i.e. up to twenty four zones, to be installed in one unit. Further zones can be incorporated by using additional CentrAlert racks

Product Updates

REVISION DATE	COMMENT
06/06/2023	HERAS previously announced the end-of-life of various products on the Geoquip product line (EoL announcement dated 09/04/21). Heras have confirmed this decision has been reversed and this product is now confirmed as available
