Apex Engineering Group

Apex 'Templar' Secure PC Workstation

Category: Security Containers

Sub Category: Computer Containers

Description

The Templar Secure PC Workstation is supplied in two sections, upper and lower. The sections bolt together to form a single unit. They are designed to house a complete PC workstation but, if a secure container for the monitor is unnecessary, just the lower unit can be used in order to house the keyboard, processor unit and printer. (Lower units are available separately).
