JBF 38-50 HD-6 Hard Drive Shredder

Category: Secure Destruction - Equipment

Description

The JBF 38-50 HD-6 Hard Drive Shredder is suitable for the destruction of all types of protectively marked media and hardware such as hard disks, tapes, phones, PDAs etc. The machine is gravity fed and knives cut the items for destruction until the product is small enough to fall through the screen below. A screen with 6mm holes is necessary to meet the NPSA specification. The unit requires a 16amp, 3-Phase power supply or suitable generator
