levo Ultimate

Category: Access Control Equipment

Sub Category: Biometrics

Description

The Ultimate reader encompasses Multi Spectral imaging technology. This technology captures 9 images all at once from the surface and below the skin enabling a quality image capture and claims to image through levels of grease, oil, water, dust, dirt and even some latex gloves. The reader is IP65 weather proof and has a built in thermostat controlled heating system. The reader integrates into existing card, fob and proximity systems. The system has built in spoof detection and a compact vandal resistant case.
