Specification

Steel faced, steel framed, large vehicle access doors are top hung with bottom ground track for guidance and enhanced security. Operated either manually or by electric push-button operation, with either manual or electronic ground bolts. Personnel wicket doors with CPNI locking systems can be added to the doors.

Interlocking seals around the door edges provide sealing against weather ingress and air leakage. Door operation can be one-way, two-way or bi-parting, and available in different colours and finishes.
