

Energetics Technology Ltd

TC95

Category: Litter Bins

Description

The TC95 has a high charge capability and is designed to work even when the explosive device detonates near the side or bottom of the unit. The shell remains intact providing all round lateral protection whilst the lid disintegrates into harmless particles. The main characteristics of the TC95 are: a large 95 litre capacity, uses standard bin bags, efficient everyday emptying procedure, easily cleaned, very low maintenance costs, bolt down mounting for extra safety and is available in a variety of finishes to suit customer specifications.
