

Project SERVATOR: An overview of its development and implementation

Project SERVATOR has been developed by CPNI to create an adverse operating environment for those involved in criminality or intent on conducting attack planning. This approach is grounded in extensive CPNI research.

Project SERVATOR was developed, evaluated and refined by CPNI in partnership with City of London Police over a five year period.

Project SERVATOR is a strategic method of policing to deter, detect and disrupt a wide range of criminal activity, from pickpocketing and property theft to terrorism, which provides a reassuring presence for the public and the communities they serve. Deployments are unpredictable and intelligence-led, turning up unannounced at any time, and last for different amounts of time. They involve uniformed and plain clothes officers together with other specially trained officers.

The community including the public, businesses and retailers play a vital role by being vigilant and reporting anything that doesn't feel right, such as reporting an unattended item or someone acting suspiciously.

Cranfield University helped provide the research to evaluate the impact of SERVATOR and its aim to reduce the vulnerability of the national infrastructure to terrorism and other threats and to help protect public places.

Assessments undertaken among the public have shown that police engagement with local communities during deployments is effective in encouraging them to be the eyes and ears for the police. Work undertaken by Cranfield University attests to the reassuring effects of the deployments on the public.

Project SERVATOR has been adopted as business as usual by:

- City of London Police
- British Transport Police
- Essex Police including at Stansted Airport
- Civil Nuclear Constabulary
- Ministry of Defence Police
- Police Scotland also utilised Project SERVATOR during the 2014 Commonwealth Games to protect crowded places and transport hubs in and around Glasgow. They are in the process a roll-out across Scotland.
- The Metropolitan Police Service including at London City Airport and Heathrow.
- North Yorkshire Police
- Royal Gibraltar Police

Working in partnership with CPNI the National Police Chiefs' Council (NPCC) is also undertaking a programme of work to implement Project SERVATOR across 10 forces in the UK: <http://news.npcc.police.uk/releases/new-police-plan-to-mobilise-communities-and-disrupt-terrorists>
